

Clear Skin. Clearly Alma.

Thought you were getting the most out of your skin cleansing treatments?
Well, think again.

Introducing DermaClear by Alma, an incredibly powerful hydradermabrasion solution that lets you thoroughly clean, hydrate and nourish your patient's facial skin. Bringing forth the top-quality standards and Alma's innovative approach, DermaClear works deeply yet gently to cleanse and rejuvenate the skin, leaving it fresh, clean and beautifully hydrated.

DermaClear is an outstanding standalone treatment, as well as a must-have pre-treatment solution used to prepare skin for various skin rejuvenation treatments. It also offers amazing results as a pre-treatment for a diverse range of skin procedures. This is undoubtedly the most effective platform available on the market today.

The path to clear
just got much clearer.

DermaClear

The New Face of Fresh Skin

3 in 1

Advanced Hydradermabrasion Platform

Alma
For You. For Life.

Skin Clarifying & Purifying at its Best!

DermaClear works in a 3-step process, pairing the highest quality of designated solutions with each step. The platform's unique rotating tip and powerful suction action enable a deep cleansing process and extraction of impurities, while ensuring highly effective penetration of solutions into the skin. DermaClear simultaneously clarifies, soothes and moisturizes, infusing skin with powerful nutrients and leaving it clean, hydrated and refreshed. This is an extraordinarily powerful regimen that enhances and expands your clinic's offer – enabling you to maximize your business potential with ease.

Boost Your ROI, Risk-Free.

A unique and innovative skin resurfacing solution, DermaClear brings together exfoliation, cleansing, extraction and hydration, to enable effective treatments with excellent results. Deep, yet gentle, DermaClear achieves both exfoliation and skin rejuvenation simultaneously, providing a soothing and refreshing experience for patients. There is no downtime, no discomfort, and no irritation. Simple to use and easy to maintain, and with its clear, user-friendly UI and simple operation, DermaClear is seamlessly integrated into any clinic with no effort. This is a must-have for any skin care clinic, as it offers a high return on investment - with virtually no risk - brought to you by Alma, the world's leading provider of skin care solutions.

The DermaClear Regimen: 3 Steps & Solutions

01 Extract and Clarify

Dead skin cells are removed to prepare surface for extraction. Thorough extraction leaves skin clean and fresh, while exposing a healthy skin surface.

DermaClear EXFO - During this step, a water soluble exfoliating solution containing Alpha hydroxyl acid (AHA) is used to efficiently dislodge dead skin cells.

02 Dislodge and Cleanse

Deep cleaning suction loosens dirt and debris from deep within the skin, leaving it clean and optimal for effective solution absorption.

DermaClear CLEANSE - The solution used during this step is fat soluble Salicylic acid (BHA). It works deeply to remove dirt and impurities from within the skin, without causing irritation.

03 Condition and Hydrate

A nourishing solution is delivered through a rotating tip, ensuring optimal skin penetration. This solution protects and hydrates, preparing skin for various following treatments.

DermaClear HYDRATE - In order to complete the procedure, during this step a hydro essence nutritional serum is used, delivering a highly concentrated level of nourishing moisture and protective antioxidants into the clean skin.
